OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Good to hear from you Ryan.

I am not sure why there is nothing on the OCD website about this spill, but .

Initially I was discussing this spill with Robert Hamlet, but more recent communication has been with Victoria Venegas. I believe at this point it will stay under Victoria's supervision at the OCD until closure, but I could be wrong. Looking at the Cc list of recipients in my recent emails with Victoria, you have been copied on much of the recent discussion. I have added Victoria onto this email thread.

I will happily send you data on the spill. The better question is where to start...presently I am trying to figure out how to shrink the file size of my pdf so I can upload the closure request to the OCD. I think once I accomplish that I can also

email it to you since it will leave our email server. I had previously requested closure after we assessed and remediated, but more samples were needed as noted below.

Please feel free to call if you like,

Aaron,

Send me the info about this spill I don't think I was notified. I do not see any documents on the NMOCD website. Has there been subsequent incidences after the 11/29/2019 event? Who is the environmental inspector from NMOCD that you were in contact with regarding this event? Thanks for your assistance.

Mike,

Thanks for your email. The spill at the Denton No.5 SWD has been remediated by Fasken and we will be submitting a request for closure through the OCD's fee portal. We had previously requested closure, however some additional samples were needed to satisfy the 2018 OCD spill rule. These samples have been collected and the lab finished analysis.

I thought that Mr. Mann had been copied on all of communications with the OCD. I'll make sure that he is copied moving forward so that he can stay informed.

Ryan, if there is anything that you need, please respond with your needs and I will send it to you.

Thanks,

Subject: Fasken Oil and Ranch LTD Denton SWD #5; API 30-025-025-05226; SW Easement SW 295 (NMSLO) November 29 2019 spill

Addison and Aaron:

When I reviewed the renewal for Fasken Oil and Ranch LTD Denton SWD #5; API 30-025-05226; SW Easement SW 295 (NMSLO), I noticed that Fasken had a spill on November 29, 2019.

Fasken must keep Ryan Mann in the Hobbs Office apprised of this spill and any remediation plans before this easement can be renewed with the NMSLO.

Thanks You

Mike
