Mike –

The attachment is an executive summary of the two documents transmitted to OCD yesterday with payment via the portal.

The surface owner representatives are the State Land Office and COG Operating, and we have submitted the documents to them as well. The first work element on this project is moving forward with a boring. We will keep you posted. We have solicited input from the SLO and COG and there may be some minor changes to the approach based upon their input.

Stay safe
