Robert,

Our 90 day remediation due date for the subject incident is 5/16/2021. We have diligently pursued remediation by delineating and hauling material. All our latest field samples were good, however when coming back from the lab we had 2 out of 21 that were just above the limit for closure. We've suffered several weather events that have delayed our progress, yet we are very close to finishing and getting to closure. For this reason I need, and am requesting, a 30 extension on our 90 day incident closure deadline.

Thanks for your consideration and I look forward to your response,

John C. Maxey P.E.
