EOG Resources, Inc. respectfully requests to extend the deadline for the Characterization/Remediation Plan for the below listed sites to Friday, September 10, 2021. During delineation activities, the consultant performing the work at the site determined that a core rig would be needed to complete vertical delineation. After making inquiries with different contractors with the appropriate equipment, the earliest date that a core rig could be scheduled is the first week of August. After confirming with the consultant performing the onsite work, they believe they can have the Characterization/Remediation plans completed and ready for submittal to NMOCD by Friday, September 10, 2021.
