13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Devon Energy Production Co., LP respectfully requests approval to TA the referenced well for five years, with annual casing integrity testing. The well was drilled in 1998 as a San Andres producer. Oil production was limited by high water rates. A high volume pump was installed in May of 2000, increasing oil production to over 30 BPD. However, water production went to more than 1500 BPD, making the well uneconomic at the prices prevailing at the time. Devon would like to reactivate the well eventually, as it would now be economic at those rates. However, each new well in our very active drilling program, now expected to extend through most of 2005, produces at high water rates initially. The water then declines to more modest levels. Still, as long as we are drilling, we are handling all the water that we can. Once our drilling program is completed, we can re-activate the Patton 6-5.
