API: 30-015-26647

Operator,

This office is in receipt of a Final Report C-141 regarding a release that occurred over an undetermined period at the above referenced well site. The C-141 is being denied at this time due to the following:

Samples obtained and field tested on 1/11/05 shows TPH levels to be above recommended action levels for this site.

At this time, we are requesting that as soon as weather conditions permit, another sampling event be performed. Samples obtained are to be tested for TPH, Chloride, and BTEX levels. Samples are to be obtained from areas known to be impacted, toward the lake playas to a point where any contaminants are non-detect or until the lake playas is reached. Further remediation actions will be determined based on analyticals of samples obtained.

Please contact this office 24 hours prior to any samples being obtained or remediation work performed.

Thank you,

A handwritten signature in cursive script that reads "Mike Bratcher".

Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.

Vent line released 8-10 bbls condensate. Will excavated and removal visible impacted soil. Will treat excavated area and back fill to grade at later date using clean soil.

Describe Area Affected and Cleanup Action Taken.*

AREA WAS EXCAVATED TO 3'-4" TO 4', SOIL WILL BE SENT TO COMMERCIAL LAND FARM, AND AREA
REFILLED WITH FRESH DIRT.
SOIL EAST SIDE OF PIT - 150 PPM TPH, AT COMPOSITE 120 PPM TPH

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOC rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOC marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health, or the environment. In addition, NMOC acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
