<b>Describe Cause of Problem and Remedial Action Taken.*</b> The low pressure separator had some trash and rubber stuck in the dump which caused the separator to flood and send fluid into both the gas line and the supply gas for the high pressure separator, once the dump for the high pressure separator was overloaded it sent 1bbl of oil in a mist out the flare line onto location and pasture. The separators were immediately drained and the gas lines were cleared.		
<b>Describe Area Affected and Cleanup Action Taken.*</b> The area affected is 30x30 on the pad and into the pasture on the Southwest corner approximately 15 feet. The location will be back dragged and the pasture will be pressure washed with Dawn soap.  The location was back dragged and the pasture was pressure washed with Dawn Soap on April 1, 2015.		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
