If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

Lease operator arrived at location and discovered that the water tank was over flowing causing an 85 bbl produced water and oil spill into lined containment. The pump was reset and within a minute the tank stopped from over flowing. Black River Trucking was called out and they were able to recover 60 bbls of produced water and oil.

Describe Area Affected and Cleanup Action Taken.*

The release was contained to the well pad. The facility infrastructure was removed. Remediation activities were carried out in accordance with NMOCD guidelines. Upon NMOCD approval of confirmation sample results, the excavation was backfilled and contoured to match the surrounding location. A closure report detailing remediation activities is provided.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
