13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

Tap Rock is requesting the Money Graham 234H continue to be shut in for a prolonged time due to current oil pricing. The date of last production was on 1/9/2020 and the well plans to be shut in until pricing has risen to an adequate level to produce. No equipment will be removed from location to impact the capability of the well to produce.

14. I hereby certify that the foregoing is true and correct.
