13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

OXY USA INC. respectfully requests approval to temporarily suspend drilling operations for 6 months from rig down date of 3/14/2020 due to current economic conditions related to the low price of oil for the well listed below.

# **OXY USA Inc. – Pure Gold MDP1 29-17 Federal Com 8H**

This is a sundry request for the following well:

API#	Well Name	Lease Serial #	Surface Section TD (ft)	Surface Section csg set depth (ft)
3001545754	Pure Gold MDP1 29-17 Federal Com 8H	NMNM0545035	470'	460'

Oxy respectfully requests approval to temporarily suspend drilling operations for 6 months from the rig down date of 3/14/2020 due to current economic conditions related to the low price of oil.

## Well history:

The Pure Gold 8H was planned and permitted as a 4 string 12.5k long lateral targeting the 3<sup>rd</sup> Bone Spring formation. This well was successfully drilled down to the surface section TD's listed in the table above and cased off with 13-5/8" 54.5# J-55 BTC, and cemented to surface per plan.

## Current status:

The 13-3/8" J-55 casing has been set and cemented per BLM approved APD. Casing shoe is set at depths depicted in table above. Cement was displaced with 8.33 ppg fresh water, and the shoe track is intact. The well is capped and has pressure gauges on the cap. Well is static.

470	470	17-1/2"	8.4-9.2	Spud Mud				TD Criteria: Into Rustler/Above Salt

## Plan forward:

Drilling operations will be temporarily suspended and the wellbore will be left as is. Oxy will plan to return to the well in approximately 9 months, pending economic conditions. Oxy will request additional shut-in status extension sundries and an APD extensions as needed, once future completions plans are finalized.
