13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

XTO Energy, Inc. respectfully submits this sundry notice of intent to revise the recompleat procedure previously approved. (EC492219)

After reviewing additional data, the decision has been made to change the interval to be monitored. XTO is requesting approval to perforate the 3rd Bone Spring interval for monitoring (previous interval was in the 2nd Bone Spring). Only the depth of perforations and depth of pressure gauge will change; remaining procedures will remain as submitted and approved.

Casing will be perforated 9,660'-9,716' (4 SPF, 60' phasing). A 5-1/2" retrievable packer and downhole pressure gauge will be set @ 9,650'. An updated wellbore diagram is attached.

14. I hereby certify that the foregoing is true and correct.
