13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date			
of starting any proposed work). SEE RULE 19.15.7.14 NMAC. For Multiple Completions: Attach wellbore diagram of			
proposed completion or recompletion.			
BTA plans to store oil and water production from BTA's 8808 JV-P Pardue #1 at our 8808 JV-P Pardue B Battery (-L-, 11-23S-			
28E). Production will be metered at the 8808 JV-P Pardue #1 well at the treater and then stored at the 8808 JV-P Pardue B battery.			
The 8808 JV-P Pardue #1 is located 345 feet from the 8808 JV-P Pardue B battery. Placing necessary tanks for the 8808 JV-P Pardue			
#1 production at the 8808 JV-P Pardue B battery will lessen the footprint at the location. The 8808 JV-P Pardue #1 will have its own			
oil and water tanks, separate from the 8808 JV-P Pardue B tanks. The 8808 JV-P Pardue #1 will have its own oil LACT meter.			
Gas production will continue to be metered at the well site and sold through our Pardue CPD (-L-, 11-23S-28E).			
Gas production will continue to be metered at the wen site and sold through our raidue of b (-b-, 11-233-28b).			
Our plans have been discussed with William V. Jones, NMOCD, Santa Fe. C107b/Administrative Approval is not required.
