13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

This well was originally approved for drilling at location 940' FSL, 990' FWL. Burnett received a compulsory pooling order to operate this well after a contested hearing with COG. COG and Burnett have reached a mutual agreement and the compulsory pooling is no longer binding. Burnett desires to move the location as shown on the attached plat in order to potentially drill Horizontally out a window. The requested surface location has been approved by Randy Rust with an on official site visit on 9/9/11.
