Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Summary of Work

LINN pulled the tubing and packer and inspected the tubing, packer & casing. LINN found that the casing was in bad shape from 0-385' and therefore elected to install a liner from the top perforations to surface. The only work completed on this workover was laying down the tubing and packer, picking up and setting a composite bridge plug above the perforations to prepare the wellbore for a Liner installation. LINN set the plug and dumped cement on top of the plug and then submitted a new NOI to install a Liner. There was no squeeze work done on this July workover.

Please see attached workover report.
