13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recomple in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

**The Original Plan:** After setting 9-5/8", 40#, casing string, the original plan called for an 8-1/2" pilot hole section to be drilled to TD (Top of the Wolfcamp), then run open hole evaluation logs, set the whipstock and sidetrack.

**What Happened:** At 8344' the decision was made to trip out of hole due to decreased rate of penetration, to change the bit and it was found out that 8-3/4" bit was accidentally ran in hole instead of 8-1/2". The correct bit was picked up (8-1/2") and the remainder of the hole section is being drilled right now. So there will be 550' of 8-1/2" hole section on bottom of the pilot hole.
