13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Upon completion of this well, the Operator will construct a buried (approx. 12" to 24" where possible) 2-7/8" steel pipeline beginning at the southwest corner of the well pad due west crossing the existing access road and turn south parallel to the access road for approximately 1/2 mile to an existing 4" pipeline, which is the point of delivery, as shown on the Attached Plat 1. Where the pipeline crosses the existing access road, the pipeline will be protected by a 6" steel sleeve and dirt mound.

The entire route has already been archaeologically surveyed and approved. See attached Plat 2.

14. I hereby certify that the foregoing is true and correct
