Apache Corporation would like to request a varience from the approved interim reclamation. The approved IR Plat suggested that the lcoation was to be built to 214x241 instead of the 270x225. There is also an extended area on the north and east sides. As well as three lease road entrances instead of the one on the north. This is due to the other locations in the area. This location has topsoil stockpiled on the north, east and south sides, which will be used to slope the north and east sides of the location. Apache would like to downsize the north by 62' up to the lease road and 37' from the east instead of the approved 70' from the north and 70' from the east.

Please see the attached drawings and other documentation.
