13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

It is the operator's intent to do earthwork to begin interim remediation to reduce the size of this wellpad, and related areas of surface disturbance, in preparation to plant the interim remediated area in accordance with the COA. This will be done in phases: The first being to coarsely recontour the disturbed area as shown on the attached diagram; The second to be preparation of a seedbed that will not be subject to erosion; the third being actual planting of the seed when it is an auspicious time relative to growing seasons and soil moisture. The last two Phases will be done under the direction of the agronomic consulting firm Organic Technologies, Inc. It is anticipated to do the earthwork in conjunction with similar work on the Hot Dog 23 Federal Well 3 and pit closure of Hot Dog 23 Federal Well 4. The seedbed preparation work will commence as soon as possible following completion of the coarse earthmoving work on the three referenced sites
