Mike

You asked about the drilling schedule. The program calls for move in rig up at Wilson 3 on 3/19. We need to begin this location next week.

After the 5-7 day drilling program at Wilson comes Cedar Lake 5 then State BK 9.

I will provide some additional clarity on the erosional feature observed at BK tomorrow and Mr. Houghton should provide an expert report on the presence/absence of OCD defined wetlands near the Cedar Lake location by next Wednesday.

Thanks for your inspection today.
