Mack Energy Corporation respectfully requests approval to surface commingle production from our Victoria Federal Lease and the Calgary Federal Lease. Once the Victoria Federal #1 well is drilled it will produce from the San Andres formation. The Calgary Federal #3 well also produces from the San Andres formation. Production from both leases will be commingled at the Calgary Federal tank battery located in the NE/4 NE/4 of Sec. 25, T15S, R28E. Allocation for the oil and gas will be done using periodic well tests.

Both leases have identical working and revenue interests

Please do not hesitate to contact me should you require any further information.

Sincerely,

Mack Energy Corporation
