#### Describe Cause of Problem and Remedial Action Taken.\*

A poly flow line ruptured releasing a produced water/crude oil mixture. Well was turned off, casing and tubing pressure were shut in, inlet valve at knockout was closed, foreman was called and roustabouts were dispatched to repair the poly line.

#### Describe Area Affected and Cleanup Action Taken.\*

The flow line ruptured along the lease road (on the east side of the road) between the Lucy ALC State #7 and Lucy ALC State #4. Initial vertical and horizontal delineation samples were taken and sent to a NMOCD approved facility. A crew will be called to do clean-up of the area once analytical results are received, and all excavated soils will be disposed of at an approved NMOCD facility. **Depth to Ground Water: >100' (approximately 125', Section 34, T21S-R31E, per Trend Map), Wellhead Protection Area: No, Distance to Surface Water Body: >1000', SITE RANKING IS 0.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
