NATURE OF RELEASE

Type of Release	Oil	Volume of Release	24bbls	Volume Recovered	20bbls
Source of Release	1/4 bleeder valve	Date and Hour of Occurrence	08-14-2013	Date and Hour of Discovery	08-14-2013 08:00am
Was Immediate Notice Given?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom?			
By Whom?		Date and Hour			
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

A 1/4 bleeder valve on the circulating pump opened causing the release. Replaced the bleeder valve with a new one.

Describe Area Affected and Cleanup Action Taken.*

Initially 24bbls of oil were released due to an 1/4 bleeder valve that failed. We were able to recover 20bbls with a vacuum truck. The entire release was contained inside the lined facility. All free fluid has been recovered. Contaminated gravel has been removed and we have replaced with fresh gravel as necessary. This location has been returned to its prior condition.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOC D rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOC D marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOC D acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
