13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Premier Oil and Gas respectfully requests approval to combine crude oil produced from separate leases. Premier proposes to commingle Yeso production from the Dale H. Parke C #23 with the production of the Parke "D" (NMLC029020D) via it's own separate header, treater, and gas meter. The commingle crude oil will be transported to the Dale H. Parke "A" Tank Battery via a Lact Unit. This commingling agreement follows the same general plan as the original request made on July 11, 2001 for the Parke "C" and "D" leases approved by the BLM. An updated site facility diagram has been provided showing the location of the headers and separator for the Parke "C" #23 and #24.
