Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Yates Petroleum is submitting the attached updated site facility diagram to include the use of a vapor recovery system. This system will capture and commingle vapors from tanks located on the Patriot/Rodke Battery- Sec 21, T19S, R25E which includes the wells listed below. Without approval to commingle, these small volumes of vapors would be lost.

## Vapor Recovery Unit (VRU) Meter Allocation Process

For VRU gas that is not included in the point of measurement meter(s).

VRU metered volumes will be added to the total gas produced/sold volumes. The VRU volumes will be allocated back monthly to each well that has produced into the stock tanks equipped with a vapor recovery system. The allocation will be based on oil production and the same formula and allocation methods will be used to allocate these volumes as is used to allocate the oil produced/sold volumes back to the individual wells as/if applicable.
