ARTESIA DISTRICT  
SEP 02 2014

Describe Cause of Problem and Remedial Action Taken.\*  
The flow line leaked due to external corrosion. The well was shut in and a temporary repair clamp was installed on the affected pipe.

Describe Area Affected and Cleanup Action Taken.\*  
The spill impacted approximately 720 sq. ft. of caliche road. All of the fluid soaked into the roadway. The impacted soil will be excavated and hauled to Lea Lands. The final remediation will be in accordance to the NMOCD and BLM guidelines for spill remediation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
