Describe Area Affected and Cleanup Action Taken.*													
Initially 80bbls of produced water were released. We were able to recover 75bbls with a vacuum truck. All free fluids have been recovered Concho will													
have the spill site sampled to delineate any possible contamination from the release and we will present a remediation work plan to the NMOCD/BLM for													
approval prior to any significant remediation work.													
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and													
regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger													
public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability													
should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other
