Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

NM OIL CONSERVATION

ARTESIA DISTRICT

DEC 19 2014

RECEIVED

Describe Cause of Problem and Remedial Action Taken.  
Well started flowing back at 1000 barrels per hour and overflowed mud pits. Trucks were dispatched and began pumping water from pits and transporting to disposal.

Describe Area Affected and Cleanup Action Taken.

The entire release was contained to the lease pad. Once drilling operations are complete the site will be cleaned up to regulatory standards.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
