By Whom? Lynn Smith; Assistant Production Foreman	Date and Hour 11-25-2014 @ 8:00 AM 7:12 AM			
Was a Watercourse Reached?	If YES, Volume Impacting the Watercourse			
🗌 Yes 🖾 No	N/A			
If a Watercourse was Impacted, Describe Fully.*				
N/A				
Describe Cause of Problem and Remedial Action Taken.*	· · ·			
The pop off valve on the 3 phase separator released 30BBLS of fluid on location due to a malfunction of the motor valve on the flare line. The				
fluid could not dump because the supply gas to the dump valve was frozen. The well was immediately shut in and the motor valve has been				
repaired.				
Describe Area Affected and Cleanup Action Taken.*	······			
	offecting on ever approximately 105?	v 165? The spill remained on location		
On the north central side of the location 30BBLS of oil was released affecting an area approximately 195' x 165'. The spill remained on location.				
25BBLS were recovered via vacuum truck. The affected equipment has been pressure washed.				
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and				
regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger				
public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability				
should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health				
or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other				
federal, state, or local laws and/or regulations.
