13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Please be advised that RKI has recently discovered that cement had not been lifted into the 9-5/8 inch casing. Consequently, RKI had decided to perform a bullhead squeeze down the 9-5/8 inch x 5-1/2 inch annulus. This squeeze project has been satisfactorily performed with the top of cement being confirmed at approximately 1,850 feet (refer to attached CBL), enabling RKI to tie back into the intermediate casing string.
