13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Oxy, respectfully requests to include the following tool in the 5.5? production casing string:

Weatherford ZoneSelect Completions System SMART Toe Sleeve.

Oxy will still be following all current COA's and regulations. The tool max OD is 6.75?, Oxy will cement as per approved APD, and will be pressure testing approved APD test value. The tool will be placed 1 joint of casing behind the float collar (inside hardlines).

See attached spec sheet for the tool.

Accepted for record

ZoneSelect® Completions System

SMART Toe Sleeve

The Weatherford SMART toe sleeve is an integral part of *ZoneSelect* multizone completion systems. When placed at the toe of the completion string, the fully cement-compatible SMART toe sleeve actuates after two pressure applications. Each pressure application can be held indefinitely to satisfy regulatory requirements. As the second pressure application ends, the sleeve opens.

When the SMART toe sleeve is open, *ZoneSelect* balls or composite plugs can be pumped down to begin subsequent stimulation operations.

Applications

- In multistage slickwater and proppant fracture applications
- In horizontal or vertical wells
- In cemented and openhole completions
- As a component of the *ZoneSelect* system

Features, Advantages and Benefits

- Actuation requires two pressure applications; therefore, a casing-pressure test can be performed before actuation or during one or both pressure applications.
- Because the sleeve does not open after the first pressure application, well integrity can be maintained if issues arise at the surface.
- The sleeve locks open, preventing accidental tool closure caused by intervention tools.
- Actuation of the first pressure application can be customized based on customer requirements, ensuring operational flexibility based on wellbore conditions.
- Each application of pressure can be held for an indefinite amount of time, enabling two opportunities to satisfy any regulatory requirements.

ZoneSelect® Completions System SMART Toe Sleeve

Specifications

Sleeve Size	5-1/2
Tubing size (in./mm)	5.50 139.70
Weight (lb/ft, kg/m)	23.00 34.27
Collapse rating (psi/MPa)	9,644 66.49
Differential burst rating (psi/MPa)	11,978 82.59
Maximum OD (in./mm)	6.75 171.45
Minimum ID (in./mm)	4.00 101.60
Initiation pressure range (psi/MPa)	3,280 to 9,560 22.61 to 65.91
Port flow area (in ² /mm ²)	9.43 6084
Temperature rating (°F/°C)	325 163
