13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

This well was shut-in in October of 2013 due to Agave Energy's Systems inability to process the high nitrogen content of the gas. Agave is currently working to install nitrogen processing equipment, which is estimated to be completed by March 2015. Agave has agreed to allow Legacy Reserves to produce this well 1-2 days a month until the system is back up and operating. Legacy Reserves respectfully request that the BLM & NMOCD accepts our internal well tests, as the form C-115 for January of 2015 will not be filed until March of 2015, as validation of the well being active and remove the well from the NMOCD's inactive well list.
