If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*

The flow line at the State 647 AC 711 Water Flood Station ruptured. The flow line was taken out of service and then repaired. A vacuum truck was brought to the site and 20 bbls of produced water was recovered.

Describe Area Affected and Cleanup Action Taken.\*

The affected area was one hundred eleven feet (111') long by one hundred fifty-five feet (155') wide. Talon/LPE excavated the saturated soil from the impacted area to a depth of four feet (4') and transported to and NMOCD approved Solid Waste disposal facility. Talon/LPE backfilled the area with soil to match the surrounding terrain and the area seeded with an approved seed mixture.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
