	ION OF RELEASE forth/South Line Feet from the East/West Line County S 2250 E Eddy
Latitude: 32.8	5744 Longitude: -103.90592
NATURE OF RELEASE	
Type of Release: Produced Water	Volume of Release: 72 Volume Recovered: 10
Source of Release: Pipeline	10/21/2011 - 0500 10/21/2011 - 0530
Was Immediate Notice Given?	If YES, To Whom? red Mike Bratcher - OCD, Terry Gregston - BLM
By Whom? Joe Hernandez	Date and Hour: 10/21/2011
Was a Watercourse Reached?	If YES, Volume Impacting the Watercourse.
If a Watercourse was Impacted, Describe Fully.*:	
Describe Cause of Problem and Remedial Action Taken.*: Injection plant lost pressure on line and shut down. Alarm system called and went out to plant. Arrived and shut in line and started looking for leak. Leak was located at a field valve and was on main trunk line. All wells on line were shut in and vaccum truck was called to pick up spill. Describe Area Affected and Cleanup Action Taken.* : impacted area was approx. 8400sqft of road and pasture. Impacted soils above regulatory threshold levels were manually and mechanically excavated from the spill area. In the bottom of the excavation a calcium amendment (gypsum) was added where the excavation had 2 points of elevated chloride levels ranging from 2760 mg/kg to 3000 mg/kg to ensure that any residual chlorides will not migrate and cause any adverse impact to the reclamation of the site. Impacted soils were transported off-site for disposal at Lea Land Landfill. Once the impacted soils were removed to acceptable levels, the pasture and the road areas were backfilled with like materials and smoothed to grade. The pasture area was seeded with a BLM #2 & #4 mix. Water bars were installed to prevent wind and water erosion.	
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
