	2 ½ inch nipple failed at the road crossing; the nipple has been replaced and the line has been returned back into service.										
in .											
	Describe Area Affected and Cleanup Action Taken.*										
	Tetra Tech inspected site and collected samples to define spills extent. Soil that exceeded RRAL was removed and hauled away for proper disposal. Site										
-	was then brought up to surface grade with clean backfill material. Tetra Tech prepared closure report and submitted to NMOCD for review.										
	I hereby certify that the information given above is true	e and compl	ete to ti	he hest of my l	nowledge and un	derstand	that nures	ant to NMC) <u>('D +11</u>	es and	
N	I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger										
153	public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health										
	or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other										
<u>نی</u>	federal, state, or local laws and/or regulations.
