December 16, 1947

Well No. 10-B is located 1980 ft. from [N] line and 1980 ft. from [E] line of sec. 11
 C SW₁ NE₁ 17S 30E N.M.P.M.
 (4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
 Square Lake Eddy New Mexico
 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cements, ing points, and all other important proposed work)

Plan to run approx. 500' 8 $\frac{1}{2}$ " casing & cement with 50 sks. preceded by heavy mud to surface--Plan to drill well to approx. 3100' or the Square Lake sand and if production of oil is obtained will run 5 $\frac{1}{2}$ " casing to within 100' of top of pay and cement with 100 sks. cement--if water is encountered in quantity in the Red Sand plan to run an intermediate string of 7" casing using mud. This pipe is to be pulled when 5 $\frac{1}{2}$ " oil string is run.

Contractors for the drilling of this well will be Martin Yates, Jr., using a Fort Worth Spudder and cable tools to total depth.

Attached is certified plat of surveyed location.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

PLEASE READ BEFORE STARTING OPERATIONS

Attention is called to the following general and special requirements most likely to be overlooked by operators on Federal oil and gas leases. Suspension of field operations may be required by the District Engineer for failure to comply with the Operating Regulations, the conditions of drilling approval, and these requirements:

GENERAL

1. All drilling and producing wells shall be permanently marked in a conspicuous place with the name of operators, lease name, serial number of lease, well number, and location. Necessary precautions must be taken to preserve such signs.
2. Any desired change of drilling plan or condition of approval must have written approval of the District Engineer BEFORE the change is made.
3. Unless otherwise specified in the approval to drill, the production string of casing must be set at the top of the pay zone, and completion shall be made with a reasonable gas-oil ratio.
4. Before work is started, written approval must be obtained, unless other acceptable arrangements are made in advance with the District Engineer, and after work is completed results must be reported to the U. S. Geological Survey by submitting complete information in triplicate on form 9-331a, covering:
 - a. Mudding or cementing, including proposed date and method of testing water shut-off.
 - b. Drill-stem tests or perforating.
 - c. Casing alterations, packer settings, or repairs of any kind.
 - d. Shooting, acid treatment, deepening or plugging back.
 - e. Gas-lift installations.
 - f. Drilling of water wells.
5. Monthly report of operations in duplicate, on form 9-329, must be submitted promptly each month beginning with spudding of the first well on a lease and continuing until approved abandonment of all drilling and producing operations.
6. Log, in triplicate, on form 9-330, must be submitted within 10 days of reaching temporary or permanent drilling depth. Copies of all electrical logs, sample cutting logs, drilling-time logs, and any other well information not given on the standard form, should be attached to same.
7. Separate application to drill any water well on federal land is required, and special procedure is necessary for abandonment of any well having a desirable water supply.
8. All wells and lease premises shall be maintained in first class condition with due regard to safety, conservation, appearance, and refuse disposal.
9. The notice of intention to drill any well is rescinded without further notice if drilling is not started within 90 days of approval.
10. Cement must be allowed to set a minimum of 72 hours on all strings of casing prior to drilling the plug, except for modifications provided by the Supervisor's order dated March 13, 1947, copy of which will be furnished on request.

Re: Las Cruces 029338-B
Well No. 10-B Gissler.

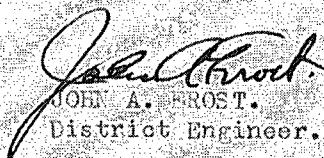

Gentlemen:

Receipt is acknowledged of your "Notice of Intention to Drill" dated December 16, 1947, covering your No. 10-B Gissler well on the subject land in SW NE, section 11, T. 17 S., R. 30 E., Square Lake Field, Eddy County, New Mexico.

Your proposed work is hereby approved subject to compliance with the provisions of the "Oil & Gas Operating Regulations" revised May 25, 1942, a copy of which will be sent you on request, and subject to the following conditions:

1. Drilling operations so authorized are subject to the attached sheet for general conditions of approval.
2. Furnish a sample description log from the base of the salt to the total depth, or an electrical log from the shoe of the 5" casing to the total depth.

Yours very truly,

JOHN A. FROST.
District Engineer.

NEW MEXICO OIL CONSERVATION COMMISSION
SANTA FE, NEW MEXICO
REQUEST FOR ALLOWABLE CHANGES

Form C-127
Revised 1-1-65

One copy of Form C-127 shall be filed with the appropriate District Office of the Oil Conservation Commission not later than the 15th of the month preceding the month for which allowable changes are requested. This form shall include only the wells for which allowable changes are desired.

Date February 3, 1977

The following allowable changes for the month of February 19 77

are hereby requested by WINDFOHR OIL COMPANY
Operator
Box #198, Artesia, New Mexico 88210
Address

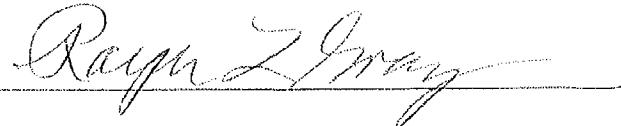

No well can be assigned an allowable greater than the amount of oil produced on the latest G.O.R. test. For wells on which top allowable is desired, enter a "T" in the Allowable Requested Column.

POOL	LEASE	WELL NO.	UNIT	S	T	R	ALLOWABLE REQUESTED	REMARKS
Square Lake (G.SA)	Gissier "B"	10	G	11	17	30	25 BOPD	Response to waterflooding.

It is further requested that all other wells operated by this producer be assigned the allowables that they are currently receiving, with the exception that top allowable wells and wells affected by excessive gas-oil ratios be given the benefit of any increase in normal unit allowable.

Re: Wells placed in pools

Gentlemen:

As the result of Division Order R-8984 the following described well (s) have been placed in the pool shown below. This change in nomenclature has been made in our files. Please change your records to reflect the proper pool name. All subsequent reports must show this nomenclature until further notice.

Grayburg Jackson - Seven River - Queen - Grayburg - San Andres Pool

Gissler #1 ·O-11-17s-30e

Gissler B #15 ·E-11-17s-30e
