NMOCD ARTESIA

Describe Cause of Problem and Remedial Action Taken.\*  
Oil and produced water released from water tank that ran over after pump failed from wiring being chewed off by cows. Vacuum truck was called.

Describe Area Affected and Cleanup Action Taken.\*  
An approximate area of 70' X 30' (all inside bermed battery). Vacuum truck picked up remaining oil and produced water. Vertical and horizontal delineation samples will be taken and analysis ran for TPH & BTEX (chlorides for documentation). If initial analytical results for TPH & BTEX are under RRAL's a Final Report, C-141 will be submitted to the OCD requesting closure. If the analytical results are above the RRAL a work plan will be submitted to the OCD. Soils tilled within battery area, vertical and horizontal delineation samples were taken (10/14/2010) and analysis ran for TPH & BTEX (chlorides for documentation). **Depth to Ground Water: >100' (approximately 125' per trend map), Wellhead Protection Area: No, Distance to Surface Water Body: >1000', SITE RANKING IS 0. Based on amounts recovered, enclosed analytical reports and site ranking of zero, Yates Petroleum Corporation requests closure.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
