3. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Per phone conversation with Mr. Joe Lara, Marbob requests approval to change BOP equipment to a 5,000 psi WP double ram hydraulic BOP without a choke manifold because the well has surface and intermediate casing in place. We will be tying back to existing 4 1/2" casing that is already set across all potential high pressure formations. The original BOPE Schematic submitted in our APD was for a new drill well, not a reentry of an existing well.
