If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\* A flowline ruptured resulting in the release of approximately 1,100bbls of produced water. Upon discovery the line was shut in and repaired. Vacuum trucks were immediately dispatched to the location and were able to recover approximately 1,040bbls of fluid. The heavily impacted soil was scraped up to prevent further spread of fluid.

Describe Area Affected and Cleanup Action Taken.\* The fluid remained within the berms of the West Redlake #1 location. Talon/I.P.E. mobilized personnel to conduct a site assessment and collect soil samples within the impacted area. Upon receipt of analytical data from the soil sampling event a remediation work plan will be generated and submitted to NMOCD and BLM for approval.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
