Describe Cause of Problem and Remedial Action Taken.*

60 BBLS produced water was released from the Balon valve on the load line due to being left open. The valve was shut in immediately to prevent further release. All tanks returned to operation once valve was properly closed.

Describe Area Affected and Cleanup Action Taken.*

60 BBLS of produced water was released when the Balon valve on the load line was left open. All released produced water remained on Pad. The area affected was on the Western portion of the Pad. The total affected area was 20' by 75' flowing in a Westerly direction. No released fluid left location. Vacuum truck recovered approximately 45 BBLS of the released produced water. Environmental agency will be contacted for remediation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
