	<input type="checkbox"/> Change Plans	<input type="checkbox"/> Plug and Abandon	<input checked="" type="checkbox"/> Temporarily Abandon	
	<input type="checkbox"/> Convert to Injection	<input type="checkbox"/> Plug Back	<input type="checkbox"/> Water Disposal	

13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

OXY USA Inc. respectfully requests to temporary abandonment this well and release the rig. Ryan Farrell-OXY received verbal approval from Chris Walls-BLM to TA the well as follows:

1. Back-off from the fish at 9602' and pull out of hole with fishing assembly
2. R/U WL, Run CBL
3. RIH w/ gauge ring to verify no obstruction, If obstruction, RD WL, RIH w/ clean out assembly.
4. RIH w/ CIBP on WL and set at 9570' (+/-30' above TOF), RD WL.
5. P/U cement stinger on 4-1/2" DP, RIH & tag CIBP
6. Stage up pumps slowly to 3-4 bpm and establish pump pressure for a minimum of 1 x BU. Monitor well on trip tank.
7. M&P 120sx 17.4 ppg CI H Cmt on top of the CIBP
8. POOH w/ cement stinger a minimum of 200' above the planned TOC

Additional data for EC transaction #364191 that would not fit on the form

32. Additional remarks, continued

9. Circulate well clean with a minimum of 1 x csg volume.
10. Displace well from 10.2 ppg brine to 10.0 ppg brine w/ corrosion inhibitor.
11. WOC until 500psi compressive strength is achieved per cement slurry lab tests. RIH & tag top of cement, POOH w/ cement stinger at controlled speed while WOC.
12. Notify BLM/NMOCD office at least 24 hrs. prior to the schedule pressure test. Perform MIT, Pressure test casing to 500psi for 30 mins while charting the pressure on appropriate chart. Test considered successful if casing is capable of holding 500 psi (leak-off to be evaluated by the BLM; no more than 10% drop during the first 15 min period).
13. Wellhead shall remain installed. A capping flange shall be fitted to the wellhead with a needle valve and pressure gauge.

Temporary Abandonment of Wells on Federal Lands
Conditions of Approval

A temporarily abandoned well is defined as a completion that is not capable of production in paying quantities but which may have value as a service well. Pursuant to 43 CFR 3162.3-4 (c), no well may be temporarily abandoned for more than 30 days without the prior approval of the authorized officer.

Temporary Abandonment (TA) status approval requires a successful mechanical or casing integrity test as follows:

1. A Notice of Intent (NOI) Sundry Notice (Form 3160-5) requesting approval to run a mechanical integrity test (MIT) or casing integrity test (CIT).
2. A description of the temporary abandonment procedure.
 - a. A bridge plug or packer must be installed as close to 50 feet above any open perforations or open hole as possible. If a cement plug is used, the top of the cement must be verified by tagging. CIBP must be capped with minimum 25 sacks cement, placed with tubing, or 35 feet of cement if placed with bailer.
 - b. The wellbore must be filled with corrosion inhibited fluid and pressure tested to 500 psi. The casing shall be capable of holding this pressure for at least 30 minutes. Any leak-off will be evaluated.
 - c. All downhole production/injection equipment (tubing, rods, etc.) shall be removed from the casing if they are not isolated by a packer.
 - d. A bradenhead test must be conducted. If the test indicates a problem exists, a remedial plan and time frame for remediation shall be submitted within ninety (90) days of the test.
 - e. Contact the appropriate BLM office at least 24 hours prior to the scheduled Casing Integrity Test. For wells in Eddy County, 575-361-2822; Lea County 575-393-3612.
3. **Provides justification why the well should be temporarily abandoned rather than permanently plugged and abandoned and an estimated date that the well will be returned to beneficial use or plugged and abandoned. 43 CFR 3162.3-4 (a) The operator shall promptly plug and abandon...wells in which oil or gas is not encountered in paying quantities...**

Wells that successfully pass the casing integrity test **may** be approved for Temporary Abandonment (TA) status provided that the operator:

1. **Submits a subsequent Sundry Notice** (Form 3160-5) requesting TA approval **with well bore diagram** with all perforations and CIBP's and tops of cement on CIBP's.
2. Describes the temporary abandonment procedure.
3. Attaches a clear copy or the original of the pressure test chart.
4. Give justification to allow well to be place in TA status and plan for future use of well with time frame that well will be place back on line or plans to P&A well will be submitted.

If the well does not pass the casing integrity test, then the operator shall within 30 days submit to BLM for approval one of the following:

1. A procedure to repair the casing so that a TA approval can be granted.
2. A procedure to plug and abandon the well.

Calmon 35 Fed 41H

1. Well is approved to be TA/SI for a period of 6 months or until 9/24/2017
