13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 19.15.7.14 NMAC. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

While cementing the production casing, operator did not witness a wiper plug bump. The production casing was pressure tested.

Operator was able to establish injection rate, indicating a wet shoe in the production string.

Current casing shoe is at 14,105' M.D. 330' toe-hardline is at 14,014' M.D. Pre-frac plat attached.

Operator plans, discussed with Mr. Gilbert Cordero, are to run a composite bridge plug rated to 10,000 psi to a depth of 13,948' M.D. and then perform casing integrity test to 6,000 psi for 30 minutes. After a successful casing test, we will continue with planned perforation and stimulation procedures of original design. The bridge plug will remain in the casing for the life of the well, providing isolation from shoe to remainder of wellbore.

Operator plans to move in and rig up equipment for this operation starting 8/28/2017 and plans to have the new successful casing integrity test completed by 8/31/2017. Operator will send successful results to Mr. Gilbert Cordero.

Spud Date:

6/28/2017

Rig Release Date:

8/5/2017

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
