If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

OXY USA INC requests approval of a surface pool commingle at the Cal-Mon 35 Federal 41H battery.
The wells feeding the battery are listed below.

The oil production will be measured through a LACT (S/N 14465558, Lat 32.2674 Long -103.754), which will serve as the Facility Measurement Point (FMP). Production will then be allocated to each well based on well test and the amount of hours the well was operating in a given month.

Gas production will be separated and measured through an Oxy check meter (S/N 117149, Lat 32.2674 Long -103.754), which will serve as the FMP.

All water will be sent to the Cal Mon 5 salt water disposal well (SWD).

APPLICATION FOR POOL COMMINGLE

Commingling proposal for Cal-Mon 35 Federal 41H Battery

OXY USA INC requests approval of a surface pool commingle at the Cal-Mon 35 Federal 41H battery. The wells feeding the battery are listed below.

The oil production will be measured through a LACT (S/N 14465558, Lat 32.2674 Long -103.754), which will serve as the Facility Measurement Point (FMP). Production will then be allocated to each well based on well test and the amount of hours the well was operating in a given month.

All water will be sent to the Cal Mon 5 salt water disposal well (SWD).

A detailed process description can be found below. The oil and gas meters will be calibrated on a regular basis per API, NMOCD and BLM specifications.

The BLM's interest, 12.5%, is identical in all wells.

#Estimated Production

Each of the two wells at the Cal-Mon 35 Federal 41H battery will have a dedicated 6' X 20' three-phase separator. Each vessel will be equipped with oil turbine meters (S/N 74546 & S/N 75067), gas orifice meters (S/N 109658 & S/N 119217), and water turbine meters (S/N 2089268717 & S/N 72627). Oil production will flow through a 6' X 20' heater treater then sent to three oil storage tanks. It will then be pumped through a LACT (FMP, S/N 14465558) and trucked to sales.

Each well will be tested daily prior to Range 1 of decline, and will be tested at least three times per month during Range 1 of decline. When Range 2 decline is started, the wells will be tested at least twice per month, then will be tested at least once per month during Range 3 of decline, as specified in Hearing Order R-14299.

Gas will be sent from the separators to a gas scrubber. It will then flow through an Oxy check meter (S/N 117149), which will serve as the gas FMP for the purpose of royalty payment, then sent to sales.

All water from the Cal Mon 35 Federal 41H Battery will be sent to the Cal Mon 5 SWD for disposal.

Additional Application Components:

The flow of production is shown in detail on the enclosed facility diagram. Also enclosed is a map detailing the lease boundaries, well and battery locations.

The working interest, royalty interest and overriding royalty interest owners are identical, so notice was not required.

Pursuant to Statewide rule 19.15.12.10(C)(4)(g) OXY USA INC requests the option to include additional pools or leases within the defined parameters set forth in the order for future additions.

After completion of facility modifications, OXY will provide BLM with an updated facility diagram.

Commingling this production is the most effective means of producing the reserves. OXY USA INC understands the requested approval will not constitute the granting of any right-of-way or construction rights not granted by the lease instrument. These applications will be submitted separately for approval per NMOCD and BLM regulations.

**Condition of Approval
Surface Pool Commingling of lease production**

1. This approval is subject to like approval by the New Mexico Oil Conservation Division.
2. This agency shall be notified of any spill or discharge as required by NTL-3A.
3. This agency reserves the right to modify or rescind approval whenever it determines continued use of the approved method may adversely affect the surface or subsurface environments.
4. This approval does not constitute right-of-way approval for any off-lease activities. Within 30 days, an application for right-of-way approval must be submitted to the Realty Section if not already done.
5. Approval for combining production from various sources is a privilege which is granted to lessees for the purpose of aiding conservation and extending the economic life of leases. Applicants should be cognizant that failure to operate in accordance with the provisions outlined in the Authorized Officer's conditions of approval and/or subsequent stipulations or modifications will subject such approval to revocation.
6. Gas measurement for allocation must be measured as per Onshore Order #5 or 43 CFR 3175 and API requirements for sales meters.
7. All gas and oil subject to royalty shall be measured as per federal regulations and shall be reported to ONRR as required. All gas which is vented, flared or used on lease shall be reported as per 43 CFR 3179 to ONRR. All gas which is vented or flared shall be subject to royalty, unless prior approval was given by the authorized officer. These volumes are royalty bearing and shall be reported on OGOR "B" as disposition code "33".
8. This agency shall be notified of any change in sales method or location of sales point.
9. Additional wells and/or leases require additional commingling approvals.
10. Notify this office 24 Hrs. prior to any meter proving to allow time for an inspector to witness.
