13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

COG Operating LLC respectfully requests to recomplete from the Middle San Andres zone to the Upper San Andres zone.

We are going to set a 10K composite frac plug at 3325', 25' above our top perforation of the producing Middle San Andres zone. We will perforate an additional 100' of San Andres zone behind pipe that geology has identified as a good target and complete the zones with 2,682 bbls of fluid carrying 125,000 lbs. of proppant. We will clean the wellbore out with bailer and RTP with the similar production equipment design from the prior installation.

Please see the following attachments:
Procedure, Wellbore Diagram and Plat
