If a Watercourse was Impacted, Describe Fully.

N/A

Describe Cause of Problem and Remedial Action Taken.*

Dehy Reboiler leaked Glycol. Washed out inside of containment and removed with vacuum truck.

Describe Area Affected and Cleanup Action Taken.*

Leaked Glycol into skid and the area north of the containment. Contaminated soil was removed to CRI Land Farm and clean soil brought in. Will assess to see if further remediation will be necessary.

Average Depth to Water: <50'

REQUESTING FINAL CLOSURE. PLEASE SEE ATTACHED LETTER

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
