13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Threshold Development Company respectfully requests permission to change the size of the pad dimensions as follows: allowing 180' to the west and 180' to the east of the centerhole and 180' to the south of the centerhole. This will allow us room to make a "camp" on this location for the rig crews, toolpushers, etc. while this well and the other two (2) proposed Threshold wells in the area are being drilled. Due to the remoteness of these locations, we believe that it will provide more safety for the rig crews allowing them to live on location rather than driving back and forth.

Please see the attached diagram showing the location of the rig, pits and camp.

14. I hereby certify that the foregoing is true and correct
