13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

During construction work the surface location of this well was inadvertently moved 50' north. Two wells are to be drilled from this pad and the construction crew thought this location was for the second well which was suppose to be 50' south. The other well was the US 13 Federal #4 located at a surface location @ 140 FSL 1840 FEL. The mistake was noticed after the drilling of the Shelby 12 Federal #7 and the rig was skidding to the US 13 Federal #4, which is now 100' south instead of 50'. All work was done on the existing pad that was approved by the APD, so no additional surface disturbance was done. Please see attached for an amended C-102 plat and Exhibit's B.
