If this is a pit closure: (1) Attach a diagram of the facility showing the pit's relationship to other equipment and tanks. (2) Indicate disposal location: (check the onsite box if you are burying in place) onsite ☒ offsite ☐ If offsite, name of facility: _____ (3) Attach a general description of remedial action taken including remediation start date and end date. (4) Groundwater encountered: No ☒ Yes ☐ If yes, show depth below ground surface: _____ ft. and attach sample results.

(5) Attach soil sample results and a diagram of sample locations and excavations.

Additional Comments:
Clean soil previously placed over the unlined pit was excavated to a minimum 3-ft depth and stockpiled on the perimeter of the excavated area.
A 106' X 60' 20-mil woven liner was placed over the top of the drilling pit (liner dimensions provided a 5-ft overlap on all sides).
After liner placement, the stockpiled clean soil was pushed back over the excavated area maintaining a 3-ft clean top soil layer over the installed top liner.

I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that the above-described pit or below-grade tank has been closed according to NMOCD guidelines ☒, a general permit ☐, or an (attached) alternative OCD-approved plan ☐.
