	<input type="checkbox"/> Change Plans	<input type="checkbox"/> Plug and Abandon	<input type="checkbox"/> Temporarily Abandon	
	<input type="checkbox"/> Convert to Injection	<input type="checkbox"/> Plug Back	<input type="checkbox"/> Water Disposal	

3. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Mewbourne Oil Company has reviewed this Capitan Reef / Delaware tops and would like to change the 12 1/4" x 9 5/8" TD from 3400' to 3500'. After further geological review, MOC shows the top of the Delaware at 3600'. While drilling the 12 1/4" hole, lost all returns at 2083'. We have 13 3/8" casing set at 1970' and cement circulated to surface. We would like to run 9 5/8" casing to +/-3500' and run DV tool / ECP at +/-1900'. First stage cement will be 300 sacks of BJ Lite and tail end with 400 sacks of Class C. Second stage will be 300 sacks of BJ Lite and tail end with 200 sacks of Class C to close the DV Tool. Plan to circulate cement to surface. If you have any questions, please call Mickey Young at (505) 393-5905.
