13. Describe Proposed or Completed Operations (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once Testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Yates Petroleum Corporation respectfully requests permission to change the surface hole and casing size as follows:

Hole Size	Casing Size	Casing Weight and Grade	Setting Depth	Sacks of Cement	Estimated TOC
26"	20"	94# X56	450'	1000sx	Circulated

The remaining hole and casing sizes will stay as permitted.

Due to BOP unavailability for the 20" casing, it is requested that a rotating head be nipped up on the 20" casing while drilling the intermediate hole.

If hole conditions warrant the 20" casing will be set prior to 450', then a 17 1/2" hole will then be drilled to 450' where 13 3/8" casing will be set and cemented to surface.

Thank-You,

*Change C 918 1.35*  
*If Halite is encountered, casing to be set 25' above Halite*

14. I hereby certify that the foregoing is true and correct
