**RE: General Plan**

Dear Mr. Dolan:

The Artesia District of the Oil Conservation Division is in receipt of a General Plan (copy attached) submitted by Yates Petroleum Corporation dated 7 December, 2004. After review the Oil Conservation Division has accepted and approved the Plan. This plan shall be in effect as of 20 December, 2004 and will supersede the "General Plan" dated 14 April, 2004 submitted by Yates Petroleum Corporation.

**Re: General Plan  
Drilling, Workover, and Blowdown Pit design and closure.**

Dear Tim,

Yates Petroleum Corp. (Yates) appreciates your meeting with us on December 1, 2004 to help clarify some issues in connection with *Rule 50* and the *November 1, 2004 Pit and Below Grade Tank Guidelines*.

As you know Yates submitted and received approval of a general plan for opening and closing of drilling and workover pits on April 15, 2004. In an effort to simplify the required paperwork, we would now like to modify that plan to include more detailed information.

For purpose of this plan Yates, et al (Yates) includes:

1. Yates Petroleum Corp.
2. Yates Drilling Company
3. Abo Petroleum Corp.
4. Myco Industries, Inc.

The modified plan is attached for your review and approval. Please contact me at 505-748-4181 if you have any questions or need further information.

Sincerely,

Dan Dolan

**Yates Petroleum Corp. et al**  
**General Plan**  
**Pit Permitting, Construction and Closure**  
**December 7, 2004**

**1. Pit Permitting and Opening –**

- a. Application for the pit permit shall be made on the Application for Permit to Drill (APD) The APD will include the following:
  - i. Site Ranking.
  - ii. Reference to this “General Plan” approved by NMOCD
  - iii. Description of the proposed disposal method as outlined below.
    - 1. When deep trench burial is proposed, approval of the APD will constitute a permit for both the drilling pit and the encapsulation pit(s). *A separate Form C-144 will not be required.*
- b. All pits will be designed and constructed pursuant to Part II of *November 1, 2004 Pit and Below Grade Tank Guidelines (Guidelines)*. Pits shall be constructed as depicted in attached *Figures A, B, C or D* based on site specific requirements.

**2. Pit Closure –**Pits will be closed based on site specific conditions pursuant to Part IV of *Guidelines* by one of the following methods:

- a. Excavation and removal Wastes will be excavated and disposed of at an off-site OCD-approved facility or location.
- b. Below Grade Encapsulation. Encapsulation will be pursuant to Part IV.B.2 of *Guidelines*
- c. Capping and Encapsulation Insitu Capping and encapsulation will be pursuant to Part IV B 3(a) of *Guidelines*
- d. Deep Trench Burial and Capping. Deep trench burial and capping will be pursuant to Part IV.B.3(b) of *Guidelines* Attached *Figures E, F and G* depict standard types of encapsulation pits utilized by Yates. Each encapsulation trench type is designed to hold 2000 cubic yards of drill cuttings
- e. Exemption Yates may request an exemption on a site specific basis as provided for in 19.15.2 50 NMAC (Rule 50)

The proposed method for pit closure will be indicated on the APD as one of the above methods. Approval of the APD will constitute approval of the closure plan. No other closure plan will be submitted. Yates will notify OCD 48-hours prior to closure of pit and submit a C-144 when pit is closed.

If, due to site specific conditions encountered during the course of operations, Yates proposes to change the method of closure, a request outlining the new plan will be submitted on a C-144 for OCD approval prior to closure.

**RE: General Plan – John A. Yates Jr., Oil Producer**

Dear Mr. Dolan:

The Artesia District of the Oil Conservation Division on 30 December, 2004 received a request for "John A. Yates Jr., Oil Producer" to be covered by the General Permit submitted by you on 20 December, 2004. This request is approved. John A. Yates Jr., Oil Producer will be added to the Yates Companies that are covered by the Plan.

**Re: General Plan  
Drilling, Workover, and Blowdown Pit Design and closure.**

Dear Van,

As you know Yates submitted and received approval of a general plan for opening and closing of drilling and workover pits on December 20, 2004, this was an amended plan, submitted for clarification and simplification of the original plan, approved by you on April 15, 2004.

We are requesting the addition of "John A. Yates Jr., Oil Producer", to the Yates Companies on the approved plan.

Please contact me at 505-748-4181 if you have any questions or need further information.

Sincerely,

Daniel W. Dolan CWC

Re: Myco Industries, Inc.  
Danu 11 Fee #2H  
H2S Contingency Plan

Dear Mr. Arrant:

Sources at Myco Industries, Inc. have relayed information to me that they believe there will not be enough H2S found from the surface through the Wolfcamp Formation to meet the OCD's minimum requirements for the submission of a contingency plan per Rule 118.

Please note that I have enclosed our Contingency Plan for this well based on a remote chance that Rule 118 might become applicable.

Thank you,

MYCO INDUSTRIES, INC.

## **Hydrogen Sulfide (H<sub>2</sub>S) Contingency Plan**

**For**

**Danu 11 Fee #2H**

**1980' FNL & 660' FEL (Surface)**

**1980' FNL & 660' FWL (Bottom-Hole)**

**Sec-11, T-18S, R-23E**

**Eddy County NM**

## Danu 11 Fee #2H Location

This is an open drilling site. H<sub>2</sub>S monitoring equipment and emergency response equipment will be used within 500' of zones known to contain H<sub>2</sub>S, including warning signs, wind indicators and H<sub>2</sub>S monitor.

**Assumed 100 ppm ROE – 3000'**

**100 ppm H<sub>2</sub>S concentration shall trigger activation of this plan.**

## Emergency Procedures

In the case of a release of gas containing H<sub>2</sub>S, the first responder(s) must isolate the area and prevent entry by other persons into the 100 ppm ROE. Additionally the first responder(s) must evacuate any public places encompassed by the 100 ppm ROE. First responder(s) must take care not to injure themselves during this operation. Company and/or local officials must be contacted to aid in this operation. Evacuation of the public should be beyond the 100 ppm ROE.

All responders must have training in the detection of H<sub>2</sub>S, measures for protection against the gas, equipment used for protection and emergency response. Additionally, responders must be equipped with H<sub>2</sub>S monitors and air packs in order to control the release. Use the “buddy system” to ensure no injuries during the response.

## Ignition of Gas Source

Should control of the well be considered lost and ignition considered, take care to protect against exposure to Sulfur Dioxide (SO<sub>2</sub>). Intentional ignition must be coordinated with the NMOCD and local officials. Additionally the NM State Police may become involved. NM State Police shall be the Incident Command on scene of any major release. Take care to protect downwind whenever there is an ignition of the gas

## Characteristics of H<sub>2</sub>S and SO<sub>2</sub>

Common Name	Chemical Formula	Specific Gravity	Threshold Limit	Hazardous Limit	Lethal Concentration
Hydrogen Sulfide	H <sub>2</sub> S	1.189 Air = 1	10 ppm	100 ppm/hr	600 ppm
Sulfur Dioxide	SO <sub>2</sub>	2.21 Air = 1	2 ppm	N/A	1000 ppm

## Contacting Authorities

Myco personnel must liaison with local and state agencies to ensure a proper response to a major release. Additionally, the OCD must be notified of the release as soon as possible but no later than 4 hours. Agencies will ask for information such as type and volume of release, wind direction, location of release, etc. Be prepared with all information available. The following call list of essential and potential responders has been prepared for use during a release. Myco Company response must be in coordination with the State of New Mexico’s ‘Hazardous Materials Emergency Response Plan’ (HMER)
